Release of Rhodamine dye for time-of-travel study

USGS Monitoring Sites in Texas

**MISSION:** To provide reliable, impartial, timely information that is needed to understand the Nation's water resources.

The Water Resources Discipline actively promotes the use of this information by decision makers to

- Minimize the loss of life and property as a result of water-related natural hazards, such as floods, droughts, and land movement
- Effectively manage groundwater and surface-water resources for domestic, agriculture, commercial, industrial, recreational, and ecological uses
- Protect and enhance water resources for human health, aquatic health, and environmental quality
- Contribute to wise physical and economic development of the Nation's resources for the benefit of present and future generations

The U.S. Geological Survey has been collecting water data in Texas since 1889. The first office was established in 1915 in Austin with a network of 18 streamflow-gaging stations. Today (2009), the Texas Water Science Center collects data at more than 500 stations.

The U.S. Geological Survey (USGS) Texas Water Science Center works in cooperation with approximately 100 municipalities, river authorities, groundwater districts, and State and Federal agencies in Texas to provide reliable, impartial scientific information to resource managers, planners, and other customers. This information is gathered by the USGS Texas Water Science Center to minimize the loss of life and property from natural disasters, to contribute to the conservation and sound economic and physical development of the Nation's natural resources, and to enhance the quality of life by monitoring water, biological, energy, and mineral resources.

If you have any questions or concerns with which we can assist you, contact us or visit our Web site at <http://tx.usgs.gov> or the national Web site at <http://www.usgs.gov>. We look forward to serving you in the near future.

#### Management staff and key specialists of the USGS Texas Water Science Center:

| <u>USGS-Texas contacts</u> | <u>Title</u>  | <u>Telephone no.</u> | <u>E-mail address</u> |
|----------------------------|---|----------------------|-----------------------|
| Bob Joseph                 | Director  | (512) 927-3502       | rljoseph@usgs.gov     |
| Greg Stanton               | Deputy Director for Studies                           | (512) 927-3558       | gbozuna@usgs.gov      |
| Tim Raines                 | Acting Chief, Hydrologic Data Collection & Management | (817) 263-6545 x201  | thraines@usgs.gov     |
| Meghan Roussel             | Central Texas Program Chief                           | (512) 927-3503       | mroussel@usgs.gov     |
| Mark Null                  | South Texas Program Chief                             | (210) 691-9262       | jnull@usgs.gov        |
| Mike Turco                 | Gulf Coast Program Chief                              | (936) 271-5312       | mjturco@usgs.gov      |
| Tim Raines                 | North Texas Program Chief                             | (817) 263-6545 x201  | thraines@usgs.gov     |
| George Ozuna               | Senior Program Manager                                | (210) 691-9225       | gbozuna@usgs.gov      |
| William Asquith            | Lubbock Field Office                                  | (806) 742-3129       | wasquith@usgs.gov     |
| Keith Snider               | Data Chief, Wichita Falls Field Office                | (940) 692-4283       | krsnider@usgs.gov     |
| Cary Carman                | Data Chief, San Angelo Field Office                   | (325) 944-4600 x20   | ccarman@usgs.gov      |
| Mark Null                  | El Paso Field Office                                  | (210) 691-9262       | jnull@usgs.gov        |
| Jaimie Ingold              | Corpus Christi Field Office                           | (361) 985-6266       | ingoldj@usgs.gov      |
| Karl Winters               | Surface-Water Specialist                              | (512) 927-3560       | kwinters@usgs.gov     |
| Greg Stanton               | Groundwater Specialist                                | (512) 927-3558       | gstanton@usgs.gov     |
| Tim Oden                   | Water-Quality Specialist                              | (936) 271-5325       | toden@usgs.gov        |
| Bruce Moring               | Biology Specialist                                    | (512) 927-3585       | jbmoring@usgs.gov     |
| Daniel Pearson             | GIS Specialist  | (512) 927-3561       | dpearson@usgs.gov     |
| Peter Van Metre            | Sediment Specialist                                   | (512) 927-3506       | pcvanmet@usgs.gov     |
| Barbara Mahler             | Karst Specialist                                      | (512) 927-3583       | bjmahler@usgs.gov     |
| Claire DeVaughan           | Geospatial Liaison for Texas                          | (512) 927-3566       | cdevaugh@usgs.gov     |
| Milton Sunvison            | Instrumentation Specialist                            | (512) 927-3533       | mwsunvis@usgs.gov     |
